Bayeligne Shewafera has been in the Pre-College Preparation Program, to make him ready for University. He scored 3.6 out of 4 in his grade 10 final exam, which qualified him for preparatory school. But he decided instead to join the Technical and Vocational Education College, where is now studying on-site construction management. He plans to succeed this shorter way to help his HIV-carrier mother. He helps his mother by caring for her 21 hens and receives money from their eggs. His mother was given the hens by Vision for Ethiopia for his family.
